Saad Mahmoud Hannout

Data Analyst

saadhanout12345@gmail.com | +20 109 722 5411 | Cairo, Egypt
LinkedIn | GitHub | Portfolio

Profile

Data Analyst with hands-on experience across public sector, ed-tech, and market research — turning raw data into dashboards and reports that drive real decisions. Skilled in identifying trends, simplifying complex datasets, and communicating insights clearly to both technical and non-technical stakeholders. Comfortable working across the full pipeline, from data cleaning to reporting and strategic recommendations.

Education

Bachelor's Degree in Computer Engineering
October 2020 – June 2025

Faculty of Engineering, Al-Azhar University, Cairo, Egypt

Graduated with Very Good (with Honors) — Graduation Project: Excellent

Experience & Internships

Data Analyst
January 2026 – Present

MCIT — Digital Pioneers Initiative (Digilians) | Quality Team

- Led nationwide data analysis efforts in collaboration with the Egyptian Military Academy, **supporting 1,000+ participants**, improving data processing and transformation, and delivering actionable insights to enhance program performance and decision-making.
- Designed and maintained interactive dashboards to track KPIs and trends, and prepared analytical reports for management using Excel, Google Sheets, Power Query, Power BI, and Looker Studio, ensuring accurate and consistent reporting across the initiative.
- Built data and reporting systems using Google Sheets and Google Apps Script, streamlining data processing, reporting workflows, and operational tasks across the initiative.

Programming Instructor
August 2025 – Present

3C Online Coding School

- Delivered programming sessions to **100+ students** across **25+ groups**, designing interactive exercises that strengthened problem-solving, logical thinking, and analytical skills. Simplified complex programming concepts for beginners and guided students through hands-on learning experiences.

Data Analytics Engineer Intern
July 2025 – August 2025

GB Corp

- Analyzed automotive market and business data to identify market opportunities, competitor positioning, and growth potential. Conducted a tire market analysis covering market size, competitors, and customer segments to uncover potential marketing and business growth opportunities.
- Integrated external demographic and socioeconomic data on population distribution, urban and rural areas, and income levels with automotive data, while collecting data from online sources to identify potential customer segments and uncover actionable business opportunities.

IBM Data Science Intern
April 2024 – October 2024

NTI

- Completed the **IBM Data Science track**, gaining hands-on experience in data analysis, machine learning, and data visualization using Python.
- Applied data wrangling, exploratory analysis, and predictive modeling across multiple projects.

Technical Skills

Programming: Python, SQL

BI & Visualization: Power BI (DAX), Tableau, Excel (Pivot Tables, Power Query), Looker Studio, Matplotlib, Seaborn

Data Analysis: Data Wrangling, Data Cleaning, Data Modeling, Statistical Analysis

Databases: SQL Server, Relational Databases

Data Collection: Web Scraping, Google Sheets, Google Apps Script, Requests, BeautifulSoup

Tools & Collaboration: Git, GitHub, Branching, Pull Requests, VS Code, Jupyter Notebook

Soft Skills

Problem solving • Decision-making • Team working • Analytical thinking • Reporting • Communication • Leadership • Eagerness to learn • Attention to detail

Projects

Marketing Campaign Performance & Budget Reallocation Analysis (Link)
Tools: Power BI, Power Query, Excel

- Analyzed 800 marketing campaigns across 6 channels, covering EGP 22.47M in ad spend and EGP 891.28M in attributed revenue.
- Evaluated ROAS, CPA, CTR, and conversion rates to identify channel performance gaps and budget optimization opportunities.
- Developed data-driven recommendations for campaign optimization and marketing budget allocation.

E-Commerce Store Performance Dashboard (Link)
Tools: Power BI

- Built a 3-page interactive Power BI dashboard analyzing 12.64M in sales, 1.47M in profit (11.61% margin), and 178K units across 5 markets from 2012 to 2015.
- Tracked sales by category and market, profit trend by year, shipping costs over time and by segment, and sales and profit by shipping mode.
- Identified Technology as the top category (4.7M), profit growth from 249K to 504K between 2012 and 2015, and Standard Class as about 60% of sales.

Sales Performance Analysis – AdventureWorks (Link)
Tools: Power BI, DAX, Power Query, Excel

- Built an interactive Power BI dashboard analyzing 56K order lines, 84K units sold, and 24.9M in revenue across product categories, regions, and time periods.
- Developed KPIs for revenue, order volume, quantity sold, and return rate (2.2% overall), and used them to flag high-return products and top/bottom performers.
- Modeled 7 related AdventureWorks tables with Power Query and DAX to deliver product-level and monthly trend insights.

SQL Queries on Northwind2021 (Link)
Tools: SQL Server

- Executed advanced SQL queries on the Northwind2021 database for data extraction and analysis, using JOINs, GROUP BY, ORDER BY, and subqueries across multiple tables to analyze sales performance, customer orders, and employee data.

Certifications & Courses

IBM Data Science — Coursera

- Completed a comprehensive series covering the basics of data science, including Python programming, data analysis, and machine learning concepts.

Data Analysis Essentials — Coursera

- Focused on the fundamentals of data analysis, including data cleaning, visualization, and basic statistical techniques.

DAX — DataCamp

- Gained proficiency in DAX (Data Analysis Expressions) to create powerful measures and calculated columns in Power BI for advanced data modeling.
